REENTRY™

NEW PURPOSE
FOR YOUR
USED FLOORING

A close-up photograph showing the intricate, woven texture of carpet tile backings. The tiles are arranged in a grid pattern, with some showing a dark, dense weave and others a lighter, more open weave. The lighting highlights the texture and the edges of the tiles.

WE
start
BY THINKING OF

A photograph showing the recycling process of carpet tiles. Several metal buckets filled with crushed carpet tile material are arranged on a wooden pallet. A metal scoop is visible among the buckets. The material appears as small, irregular fragments of carpet and backing. The REENTRY™ logo is visible in the top right corner of the image.

THE
finish

You can't have a circular economy without thinking about what happens at the end of a product's lifecycle. So our work begins at the design stage.

This is how CQuest™Bio and CQuest™BioX were born: Through durability enabling product ReUse and designed for Recycling. Moreover, carpet tiles using these backings contain on average 88% of recycled and bio-based materials.

Which means a carbon footprint so low, it's practically on the floor.

And the carpet tiles that can't be reused or recycled into new carpet tiles? We convert the older Graphlex® tiles back into energy.

MADE FOR *circularity*

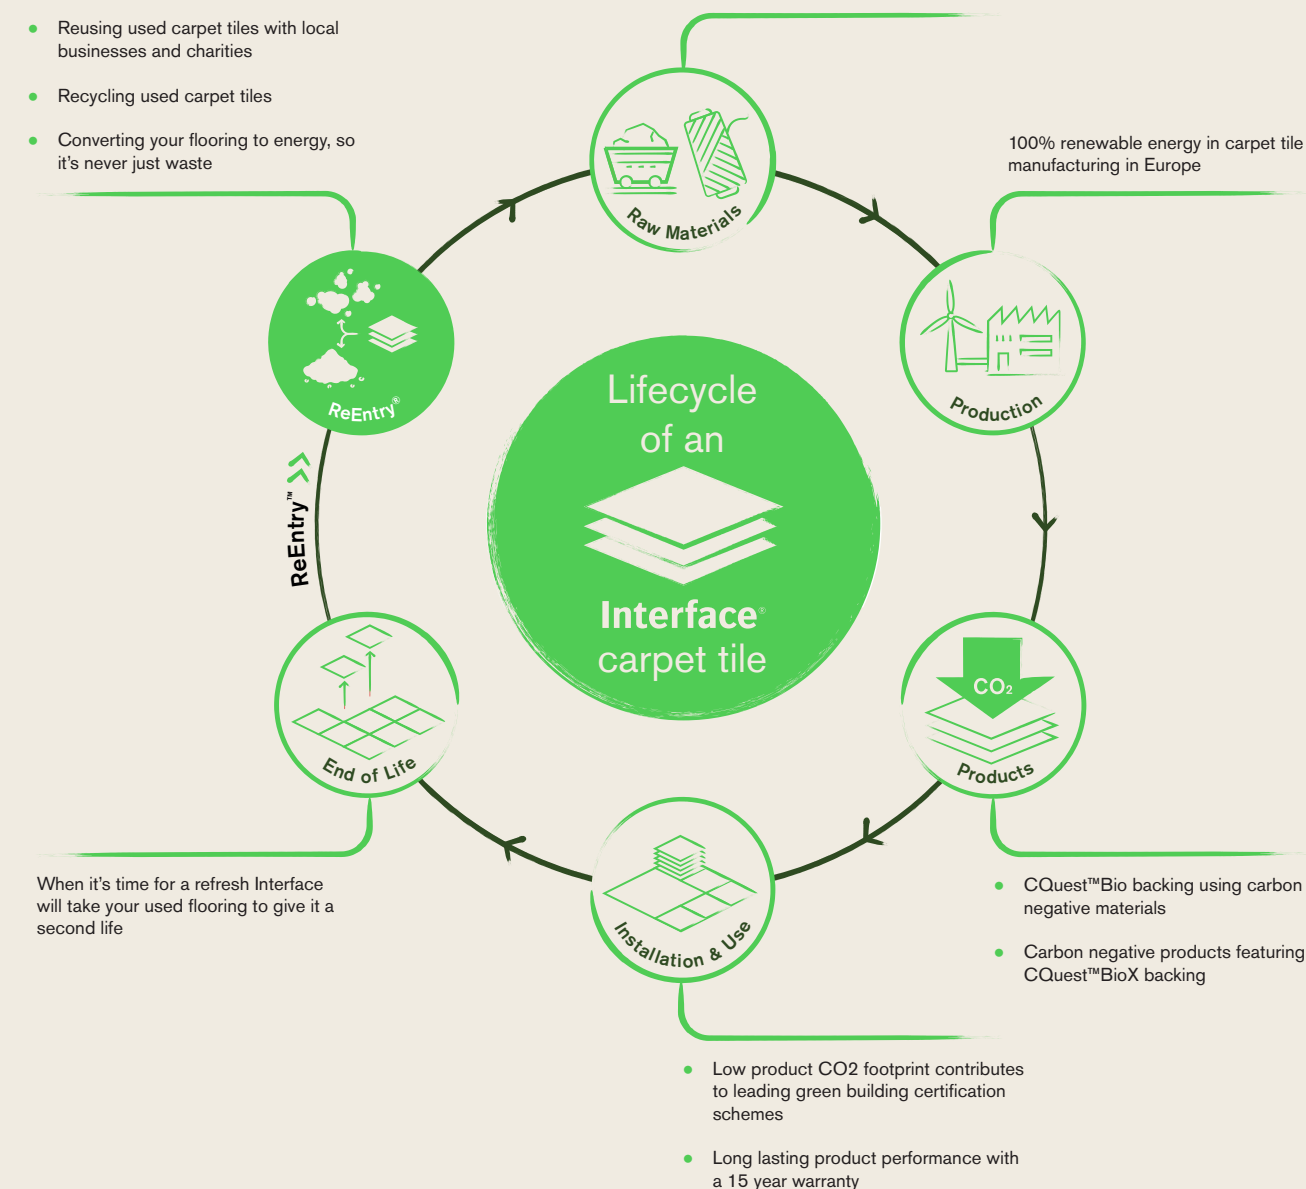

Our **ReEntry™** program aims to close the circle and avoid landfill by either:

- Reusing used carpet tiles with local businesses and charities
- Recycling used carpet tiles
- Converting your flooring to energy, so it's never just waste

High levels of bio-based and recycled material, to help produce a low carbon footprint

100% renewable energy in carpet tile manufacturing in Europe

THERE'S NO BETTER USE THAN *reuse*

We design our products to last. And last. And last. Then be reused by local businesses, charities and social enterprises.

That's been our way for more than 25 years.

HOW TO GIVE YOUR USED FLOORING A *new life*

Whatever your reasons for sending your used carpet tiles back to us, we always start by looking to reuse them. We do this in three steps:

1. We collect your used carpet tiles
2. Our partners help us find them a new home
3. You get a certificate proving your commitment to waste reduction

OUR PROCESS

TALK TO OUR TEAM

Talk to us about your needs.

PREPARE FOR COLLECTION

Follow our simple guide on how to pack your used tiles.

RECEIVE YOUR CERTIFICATE

Proof of your positive impact.

MADE FOR

recycling

When the best option is recycling, here's how it works: first, we collect your used tiles and bring them to our factory in Scherpenzeel, The Netherlands. Then, our recycling machine kicks into gear.

This machine isn't just any ordinary equipment. It's been third-party verified by Lloyd's, ensuring that the output of the recycling process creates raw materials that can be used for new products.

Used carpet tiles are recycled into new carpet tiles and high-performance engineered plastics. That's what our CQuestBio and BioX and backings make possible.
